LONGMANS, GREEN & CO.'S PUBLICATIONS

THE PRESENT CONFLICT OF IDEALS: A Study of the Philosophical Background of the World War. By RALPH BARTON PERRY, Professor of Philosophy in Harvard University. Author of "Present Philosophical Tendencies." 8vo. 564 pages. $4.50 net.

In this volume the author prints his lectures delivered at the University of California in the spring of this year. He hopes that the discussion of ideas now in the air may have immediate value for those why are trying, as he is, to understand the deeper issues of the war. The book may also serve as a companion volume to "Present Philosophical Tendencies"; in that the author dealt mainly with the technicalities and fundamentals; here he deals with the moral, emotional, political and religious implications. In order that the two books may be used together, a similar order of topics has been followed—aspects of naturalism, aspects of idealism, aspects of pragmatism and the practical implication of realism. The concluding portion of the volume consists of an attempt to relate these tendencies to the conflicting national ideals of the war.

THE NEW STATE. Group Organization the Solution of Popular Government. By M. P. FOLLETT, Author of "The Speaker of the House of Representatives," etc. 8vo. 385 pages. (November, 1918.)

The most striking characteristic of present political *theory* is its reaction against the state. The most salient political *fact* today is the increasing amount and power of group-life—trade-unions, professional societies, citizens' leagues, neighborhood associations, etc. The most pressing political *problem* is the relation of all these groups to one another and to the state.

All this indicates a new state. This book seeks to find the essential principles which shall underlie the new state through an analysis of the psychological basis of group organization.

The Origin and Philosophy of Language

By LUDWIG NOIRE

Cloth - - $1.00

"All future philosophy will be a philosophy of language."—*Max Muller.*

"Whoever wishes to explain humanity must understand what is human; he must know the points upon which everything else turns, and from which everything else must be derived. Language contains the key to the problem, and whoever seeks it elsewhere will seek in vain.

Here (continues the author, after showing by a number of well-chosen instances to what curious self-deceptions reason is exposed through her own creations) a large field is open to the student of language. It is his office to trace the original meaning of each word, to follow up its history, its changes of form and meaning in the schools of philosophy, or in the market-place and the senate. He ought to know how frequently the same idea is expressed by different terms. A history of such terms as to know and to believe, Finite and Infinite, Real and Necessary, would do more than anything else to clear the philosophical atmosphere of our days."—*The Author.*

NOTE—(This edition of Noire's valuable treatise on Language is a reprint of the edition published by Longmans Green in London in 1877 to which is added two additional chapters published in Chicago 1889 by The Open Court Publishing Company.)
